

Life Innovation Center (LIC) tenants

(Officially publicized **26 tenants** listed in Japanese alphabetical order)

As of Oct. 11, 2021

Name	HQ Location	Main Business at LIC
Agilis GTRI Japan K.K.	Kawasaki-ku, Kawasaki City	R&D and production of viral vectors related to gene therapy products, conducted jointly by Gene Therapy Research Institute Co., Ltd.
AS ONE Corporation	Nishi-ku, Osaka City	Provision of cell culture facilities and training for lab personnel such as cell culture technicians, contract gene analysis
Gene Therapy Research Institution Co., Ltd.	Kawasaki-ku, Kawasaki City	R&D and production of innovative gene therapy formulation
Elixirgen Scientific, Inc.	Baltimore, MD, USA	Sales, distribution and customer support of human iPS cell-derived differentiated cell and stem cell-related reagents
Osaka Sanitary Co., Ltd.	Settsu City, Osaka	Development of technologies for culture of a large volume of iPS cells by using agitation culture technologies for food and medical industries
Kanagawa Institute of Industrial Science and Technology (KISTEC)	Ebina City	Promotion of projects of Regional Innovation Ecosystems
Kanagawa University of Human Services	Yokosuka City	Operation and management of remote security area of Tohoku University Tohoku Medical Megabank Organization (ToMMo) and promotion of collaboration with domestic and overseas research institutions
KSP Inc.	Takatsu-ku, Kawasaki City	Support to startups using the knowhow obtained in Kanagawa Science Park (KSP), and investment through venture fund
Keio University	Minato-ku, Tokyo	Production and supply of cells for regenerative medicine by using a shared CPC facility
SYSMEX CORPORATION	Chuo-ku, Kobe City	R&D involving the medical applications of artificial intelligence technology, systems biology, and other advanced information technologies
Shimadzu Science East Corporation	Taito-ku, Tokyo	Sales and information service of life science equipment and peripheral devices
Seiko Holdings (Biotec Lab Inc.)	Fukuoka City, Fukuoka	Provision support of reagent, culture equipment and tools in regenerative medicine studies, publicizing new technologies using demonstration rooms and exchanging expertise in seminars

Name	HQ Location	Main Business at LIC
Life Science Institute, Inc.	Chiyoda-ku, Tokyo	Research, development and production of regenerative medicine products using Muse cells
Taiga Biotechnologies Japan	Aurora, CO, USA	Research and development of cell based immunotherapy against infectious disease and cancer
DAI-DAN Co., Ltd	Osaka City, Osaka	Promotion of open innovation with regenerative medicine industries and researchers in CPF Open Laboratories; relaying information through seminars
Takara Bio Inc.	Kusatsu City, Shiga	Clinical development of gene therapy, contract-based production of cells used in regenerative medicine, their process development and quality management tests
Tella Pharma, Inc.	Shinjuku-ku, Tokyo	R&D and production of the dendritic cell vaccine in cancer immunity therapy
DOJINDO LABORATORIES	Kamimashiki-gun, Kumamoto	Development of research agents used for cell functional analysis
Knowledge Palette, Inc.	Kawasaki-ku, Kawasaki City	High-precision quality control and manufacturing of cells for medical use
PharmaBio Corporation	Nishi-ku, Nagoya City	Under Pharmaceuticals and Medical Devices Law, providing one-stop solution for contract-based production and development of study drugs & approved products of regenerative medicine
BrightPath Biotherapeutics Co., Ltd.	Kurume City, Fukuoka	R&D of cancer immunotherapeutic drugs (including cell therapy products)
Mitsubishi Logistics Corporation	Chuo-ku, Tokyo	Creation of logistics platform (mainly for cell banking and transport) for regenerative medicine and cell therapies
Metcela Inc.	Tsuruoka City, Yamagata	R&D for utilizing fibroblasts in cardiac disease therapy
RIKEN GENESIS CO., LTD.	Shinagawa-ku, Tokyo	Contract-based gene analysis service using advanced gene analysis technology and bioinformatics; development, production and sales of in-vitro diagnostic agents
Ricoh Co., Ltd.	Chuo-ku, Tokyo	Development of bases for precision 3D cell prints aimed at creating 3D human tissues which can be applied to regenerative medicine and drug effect tests
ReproCELL, Inc.	Kohoku-ku, Yokohama City	Banking of human cellular tissue materials and human iPS cells, and research, development and production of regenerative medical products.
